

PRODUCT PERFORMANCE GUARANTEE

We stand behind our products. Try our solutions risk-free.

together with

Ready to solve agriculture's greatest challenges with you.

Tidal Grow AgriScience stands behind its bioactive solutions designed to fit any cropping system. Regardless of your agricultural practices, we are proud to stand behind our products. If you don't at least break even on the cost from using our product(s), we will provide your retailer a refund to issue credit your account.

Enroll online

TidalGrowAg.com/product-guarantee

Eligibility

- 1 Grower must use a Tidal Grow AgriScience product: Pacific Gro[®] Oceanic & Organic, Pacific Gro[®] SeaPhos & Organic, Spectra[®], and/or GenMAX[®].
- 2 Grower must apply according to the respective recommended rate and application timing via product label, Tidal Grow AgriScience published Application Guides, Certified Crop Advisers, or the selling retailer.
- 3 Grower must enroll a minimum of 40 acres within a test field within 60 days of application. Any crop can be used.

Program Requirements

- 1 The grower must be willing to share digital agronomic data for all treated and respective non-treated acres with Tidal Grow AgriScience to apply and qualify.
- 2 The grower needs to enroll in the Product Performance Guarantee within 60 days of first application of a product for the given crop year.
- 3 Harvest data and claim submissions must be submitted within 120 days of harvest.
- 4 A minimum of 40 acres must be treated in the grower trial.
- 5 The total non-treated acres must represent at least 5% of treated area in each field. Examples of acceptable treated and non-treated areas are provided below.
- 6 Farming practices must be identical across treated and non-treated acres, except the Tidal Grow AgriScience product(s) used on the treated acres. Farming practices required to be identical, but not limited to include: Seed variety, seeding rates and seed treatments; Soil type; Irrigation timing and rates, if applicable; Crop protection products, time and rates.
- 7 Treated and non-treated areas must be substantially similar in terms of topography, soil type, and drainage (headlands excluded for analysis).
- 8 Check strips are required at 30% or more in a given treated test field. Grower must share all as-applied acres via Arva Intelligence, and payout will be based on total as-applied acres submitted.

visit TidalGrowAg.com/product-guarantee

- 1 A grower or retailer must complete the online enrollment application within 60 days of product application.
- 2 Login into Arva Intelligence to sync your precision agriculture data to the platform. As-applied maps and digital agronomic data are required to complete the Product Performance Guarantee application within the Arva Intelligence platform.

Program Details

Tidal Grow AgriScience offers a Product Performance Guarantee on all products meaning a grower will receive a credit with their original selling retailer as a refund up to 1x return of crop if Return on Investment (ROI) from increased yield does not offset the price paid by the grower for the product.

Approved claims will be issued back to the selling retailer/dealer to distribute to the grower as a credit on their account. This Product Performance Guarantee does not act as or is meant to replace crop insurance for natural disasters or weather events, such as but not limited to hail, flooding, drought, tornado, derecho, or damaging wind events, that negatively impact crop performance of the treated fields. Additionally, if the crop performance is impacted by factors beyond the control of Tidal Grow AgriScience, such as civil disorders, government acts, epidemics, quarantines, embargoes, or other acts of God, or if the field did not receive standard care with good agricultural practices for the

Tidal Grow[®]
AgriScience

together with

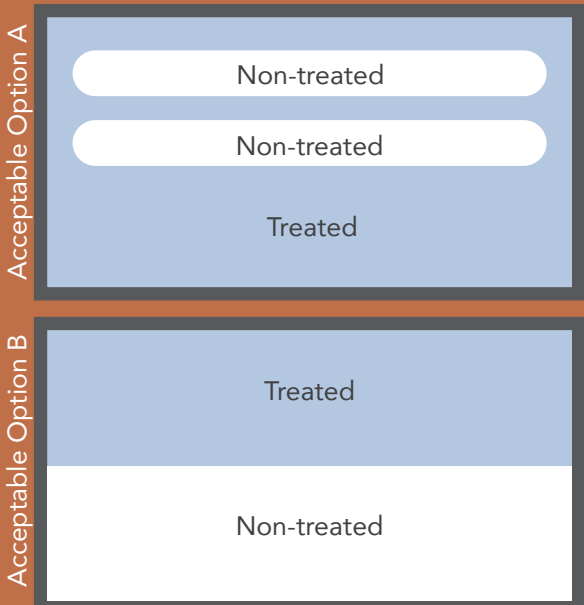

crop type and region, then this Product Performance Guarantee does not apply. Tidal Grow AgriScience reserves the right to limit the number of years for participation in this program.

Calculation

The value of yield is determined by the difference between treated and non-treated (average of all non-treated check strips) yield/acre multiplied by your local market price for the crop tested on the day of harvest. The maximum credit available per acre for the Product Performance Guarantee is the \$/acre paid by the grower for any Tidal Grow AgriScience product.

Acceptable protocol for setting up your trial.

Check strips allow for fair comparison between standard areas of the field.

Unacceptable protocol for setting up your trial.

Check strip is along headlands in A. Check strip is not side-by-side treated areas in B.
