

PRODUCT GUARANTEE

RISK-FREE RESULTS YOU CAN COUNT ON

We stand behind our products.
Try our solutions risk-free.

We believe in the effectiveness of our crop products and your right to grow with confidence. Our Product Guarantee program lets you try our solutions risk-free—if they don't pay for themselves, we'll work with your retailer or dealer to make it right. We're here to support your farm's success today and ensure it thrives for generations to come.

GROWER ELIGIBILITY

Program Details and Requirements

- 1 Apply eligible Tidal Grow® AgriScience products at the recommended rate, timing, and frequency, according to the label, a crop adviser, a retailer, or a Tidal Grow® AgriScience representative.
- 2 Enroll a minimum of 40 acres within a single test field.
- 3 Complete the enrollment form within 60 days of the first product application.
- 4 Provide digital agronomic yield data and as-applied maps through the Arva Intelligence CropForce™ platform.
- 5 Verify that crops and operations have machine-generated yield data to participate.

ELIGIBLE PRODUCTS

Tidal Grow® GENMAX®
 Tidal Grow® GENBOOST
 Tidal Grow® Spectra
 Tidal Grow® Chroma
 Tidal Grow® Oceanic®
 Tidal Grow® Oceanic® Organic
 Tidal Grow® SeaPhos®
 Tidal Grow® SeaPhos® Organic

ELIGIBLE CROPS

Corn
 Soybeans
 Wheat
 Cotton
 Canola
 Dry beans
 Potatoes

HOW THE PROGRAM WORKS

Program Details and Requirements

Tidal Grow® AgriScience offers a Product Performance Guarantee on all products meaning a grower will receive a credit with their original selling retailer as a refund up to 1x the cost of the product(s) if the return on investment (ROI) from increased yield does not offset the price paid by the grower for the Tidal Grow® AgriScience product(s).

Approved claims will be issued back to the selling retailer/dealer by Tidal Grow® AgriScience to distribute to the grower as a credit on their account. This Product Performance Guarantee does not act as or is meant to replace crop insurance for natural disasters or weather events, such as but not limited to hail, flooding, drought, tornado, derecho, or damaging wind events, that negatively impact crop performance of the treated fields. Additionally, if the crop performance is impacted by factors beyond the control of Tidal Grow® AgriScience, such as civil disorders, government acts, epidemics, quarantines, embargoes, or other acts of God, or if the field did not receive standard care with good agricultural practices for the crop type and region, then this Product Performance Guarantee does not apply.

The grower must meet all the program eligibility requirements in order to submit a claim, should the product(s) not perform.

Tidal Grow® AgriScience reserves the right to limit the number of years for participation in this program.

CALCULATION

The value of yield is determined by the difference between treated and non-treated (using spatial analytics to ensure uniform comparison) yield/acre multiplied by your local market price for the crop tested on the day of harvest. The maximum credit available per acre for the Product Performance Guarantee is the US\$/acre paid by the grower for any Tidal Grow® AgriScience product.

TEST FIELD SET-UP

Follow these easy steps to try our products risk-free

Farming practices must be identical across treated and non-treated acres, except the Tidal Grow AgriScience product(s) used on the treated acres. Farming practices required to be identical, but not limited to include: Seed variety, seeding rates and seed treatments; Soil type; Irrigation timing and rates, if applicable; Crop protection products, time and rates.

Treated and non-treated areas must be substantially similar in terms of topography, soil type, and drainage (headlands excluded for analysis).

Check strips are required at 30% or more in a given treated test field. Grower must share all as-applied acres via Arva Intelligence, and payout will be based on total as-applied acres submitted.

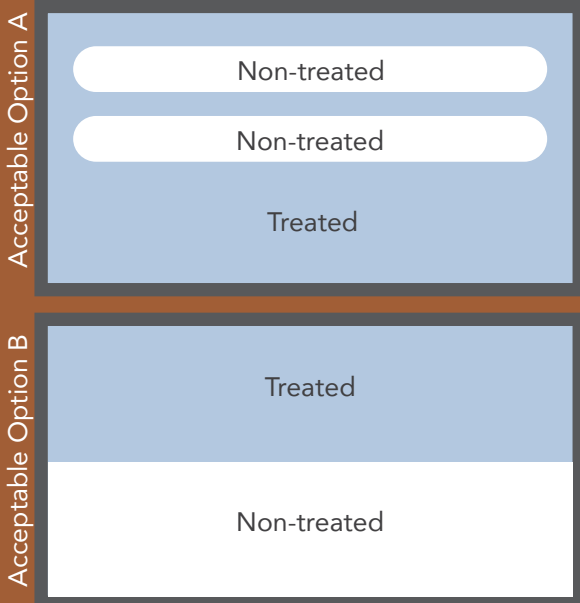

HOW TO ENROLL

1 A grower or retailer must complete the enrollment application on the Tidal Grow AgriScience website within 60 days of product application. A member of our Commercial Ag Science team will reach out to confirm enrollment and next steps. TidalGrowAg.com/product-guarantee

2 Login into Arva Intelligence CropForce™ to sync your precision agriculture data to the platform. As-applied maps and digital agronomic data are required to complete the Product Performance Guarantee portion of the application within the Arva Intelligence CropForce™ platform.

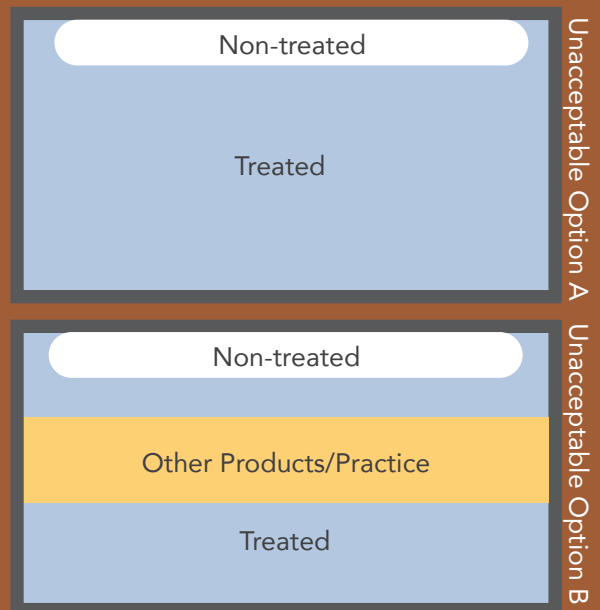

Acceptable protocol for setting up your trial.

Check strips allow for fair comparison between standard areas of the field.

Unacceptable protocol for setting up your trial.

Check strip is along headlands in A. Check strip is not side-by-side treated areas in B.

ARVA INTELLIGENCE

We've teamed up with Arva Intelligence to enhance the transparency and accuracy of our product guarantee program. Their CropForce™ platform collects and analyzes detailed field data that allows you to track product performance, verify outcomes, and optimize your practices. Together, we're providing the insights you need to maximize returns while supporting smarter, more sustainable farming.
